

You Look Yellow

The trouble is, your liver's sick. One of its products, "bile," is overflowing into your blood.

You can't digest your food, your appetite is poor, you suffer dreadfully from headache, stomach ache, dizziness, malaria, constipation, etc. What you need is not a dose of salts, cathartic water or pills—but a liver tonic

Thedford's Black-Draught

This great medicine acts gently on the sick liver. It purifies the blood, renews the appetite, feeds the nerves, clears the brain and cures constipation.

It's a true medicine for sick liver and kidneys, and regulates all digestive functions. Try it. At all dealers in medicines in 25c packages.

The Emperor of China sacrifices to the god of agriculture on the second day of the third moon. He personally plows a portion of the ground in front of the altar as a proof that the profession of agriculture is an honorable one.

A TRAGIC FINISH.

A watchman's neglect permitted a leak in the great North Sea dyke which a child's finger could have stopped, to become a ruinous break, devastating an entire province of Holland. In like manner Kenneth McVey, of Vancouver, B. C., permitted a little cold to go unnoticed until a tragic finish was only averted by Dr. King's New Discovery. He writes: "Three doctors gave me up to die of lung inflammation, caused by a neglected cold; but Dr. King's New Discovery saved my life. Guaranteed best cough and cold cure, at E. T. Whitehead & Co.'s drug store, 50c and \$1.00. Trial bottle free."

"Do you think your father would like me as a son-in-law?" "Yes, I like you," he said. "Oh, joy! I—Papa and I never agreed about anything, you know."—Cleveland Leader

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN.

Successfully used by Mother Gray nurse in the Children's Home in New York, Cure Feverishness, Bad Stomach, Teething Disorders, move and regulate the bowels and destroy worms. Over 30,000 testimonials. They never fail. At all drug stores, 25c. Sample Free. Address Allen S. Olmsted, Le Roy, N. Y.

7-5-14

The Eagle—I have one great advantage over you. I don't need to keep adding automobiles all the time.

The Cow—No; but just wait till they get these airplanes going—Scottish American.

A hundred years ago the best physician would give you a medicine for your heart without stopping to consider what effect it might have on the liver. Even to this day cold cough and cold medicines invariably bind the bowels. This is wrong. Bee's Laxative Cough Syrup with Honey and Tar acts on the bowels—drives out the cold—clears the head, relieves all coughs, cleanses and strengthens the mucous membranes of the throat, chest, lungs and bronchial tubes. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

"The hotel is so crowded, sir, that the best we can do is to put you in the same room with the proprietor." "That will be all right; just put me, valuable in the safe."—Chicago Journal

The tar that is contained in Bee's Laxative Honey and Tar is harmless. It is not cold tar, but is obtained from the pine trees of our own native forests. Bee's Laxative Honey and Tar, is the best remedy for cold, because it acts on the bowels—thus expelling all colds from the system. Bee's is the original Laxative Honey and Tar, and is best for coughs, colds, croup, whooping cough, lung and bronchial affections. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

Lawyer—Your Honor, I want an interpreter for my client. Judge—What language does he speak? Lawyer—He's a railroad brakeman—St. Louis Post-Dispatch.

Does evil still, your whole life full? Does love abide? Your thoughts abide on suicide? You need a pill!

Now for prose and facts—DeWitt's Little Early Risers are the most pleasant and reliable pills known today. They never gripe. Sold by E. T. Whitehead & Co.

"How did that young stripling get that diplomatic position? Has he ever shown any diplomatic ability?" "Yes, indeed! He landed the job."—Detroit Free Press.

When applied and covered with a hot cloth Pinesalve acts like a poultice. Best for burns, bruises, boils, eczema, skin diseases, etc. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

MAKE QUEER NEIGHBORS.

By Singular Tide of Events Race-tracks and Cemeteries Are Brought Together.

How very strange it is that race tracks and cemeteries nearly always go hand in hand. The old City race course, which became a terrible stench in the nostrils of the national government, was midway between the Harpers Mount cemetery on the northwest and the Mount Olive cemetery on the southeast. It is now converted into a burying ground, says the New York Press. Famous old Guttenberg ("The gut"), place of a million crimes in racing, is to-day one of the loveliest graveyards beyond the Palisades. To reach the track of the Brooklyn Jockey club at Gravesend you must pass by several cemeteries and I have no doubt the track itself will soon become as good as a burial ground for dead men as for "dead" horses.

To get to Gravesend (think of that name for a race track—the grave-end!) you pass half-way around beautiful Greenwood and split Washington cemetery into three sections. To reach the Sheepshead bay course of the Coney Island Jockey club you are flanked on one side or the other by such homes of the dead as Calvary cemetery, New Calvary cemetery, Linden Hill cemetery, Lutheran cemetery, Cemetery of the Evergreens, Union Field cemetery, Fresh Pond cemetery, Cemetery of the Holy Cross, Kings county insane asylum, Mount Olivet cemetery, Mount Nebo cemetery, Cypress Hills cemetery, etc. To reach Belmont park you must take all these in and more. It is the same with Aqueduct and Jamaica.

The most celebrated of all southern race tracks was converted into a cemetery not many years ago—the old Metairie track. Nothing like it ever was known in the north, and probably never will be. With that semi-French freedom of conscience, that lack of strict social restraint, the Metairie course was as generous in its heyday. The infield was reserved for the "lorettes" above the canal and the frail sisterhood below it. In the grand stand only the mothers, wives, sisters and daughters of the aristocracy were allowed to circulate. But again, with that semi-French freedom, the rich rakes of the upper ten, the swell bachelors, the young men with sweethearts among the elect of the crescent city, would think nothing of courting for an hour in the grand stand and then crossing to flirt for another hour with some lovely Thais, Phryne or Delilah. This was considered quite the proper thing. And Metairie is a cemetery! And Oaklands is next door!

MISUNDERSTOOD DRUG LAW

Pharmacy Act Passed in the Transvaal Regarding Poisons in Medicines.

Much misapprehension appears to exist among American patent medicine manufacturers as to a new pharmacy act in the Transvaal, passed at the last session of the colonial council after a heated debate. It does not restrict the sale of any medicine containing poison, though the same must be labeled "Poison," and country storekeepers are not debarred from selling, as hitherto.

Under an act passed a year ago all medicines containing poison must be so labeled, and every chemist has a list of the poisons in his store, so that if the medicine companies doing business in the Transvaal do not publish the formulas with each bottle sold they are subject to prosecution; in truth, the chemist is not permitted to let such medicines leave his store under penalty.

If any of the following poisons are found to be contained in a formula the bottle must be labeled "poison": Almonds, essential oil (unless deprived of prussic acid), belladonna and its preparations.

The purchaser must be known to the druggist or have one who is known to certify for him; he must also sign his name and address, and the druggist must place his name and place of business upon the label. This law has absolutely rooted out the evil existing at Johannesburg, where Chinese men could heretofore secure whatever amount of opium they desired by merely applying. For, if any can sign their names, and even then, unless known to the chemist, they are unable to buy. However, it has not stopped the smuggling of opium into the compound, and it is stated that the Chinese are still in that manner able to procure the drug.

Making a Dog Understand.

A dog understands "yes," and is equally competent to grasp the "no." Outside of that he is all dog and follows his dog ways. He indulges in no mental refinement and will not comprehend many of your changes of mood or mind. Whatever you undertake to teach, make it plain, simple and unchangeable. It is a pity that he must be taught not to jump up on people and compliment them with his caresses. He means well, but must be disciplined sternly into knowing that it is not good form under any circumstances. The discipline need not be accompanied by any severity. A light touch with a whip, if applied invariably, will soon settle the matter. Some kennel men adopt the plan of stepping lightly on the hind foot, and it is perhaps the clearest way of conveying the idea—Outing.

English Birds in New York.

Several English song birds, including the lark, nightingale and thrush, are thriving in an outdoor flying cage in the New York zoo and make themselves quite at home with American birds.

A CERTAIN CURE FOR ACHING FEET.

Shake into your shoes Allen's Foot-Ease, a powder. It cures Tired, Aching, Callous, Sweating, Swollen feet. At all Drugists and Shoe Stores, 25c. Sample FREE.

PARKER'S HAIR BALM
Cures itching scalp, dandruff, and keeps the hair soft and beautiful. It is the best hair dressing for men and women. Sold by E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

IMMUNITY FROM PNEUMONIA

May Be Ensured by Healthy Living and Attention to Sanitary Conditions.

Though modern medical science has decided that pneumonia is an infectious disease that fact need not terrify if one take a little trouble to learn something about the disease. It is produced by a special microbe the existence of which is so common in the month of even healthy individuals that it is considered almost as a normal inhabitant of the upper part of the digestive tract. One reason why the saliva of a human being is likely to prove fatal to animals if injected subcutaneously is because the special property of the germ is to produce pus whenever it gains entrance directly under the tissues. It does not produce a purulent inflammation in pneumonia, because it lies on the mucous membrane of the lungs, but does not gain an entrance into the tissues. Sometimes it finds its way into the blood, but does not produce serious results unless the patient is much run down.

From these facts it can be seen that the problem of the method by which pneumonia is contracted is exceedingly difficult. The presence of the germ is not sufficient alone to produce the disease, but there must be a certain predisposition on the part of the patient, followed by the deposition of this germ on a mucous membrane.

Though the method of the distribution of the disease is not known definitely it is acquired by mingling with crowds at a time when one is tired, or when, for some reason or other, the interval since taking food has been longer than usual.

Dr. Anders, who is an authority on climatology, says in an article on lobar pneumonia: "The coincidence of existing low temperatures, high barometric pressure, the direction and velocity of the wind and maximum mortality from pneumonia is so uniformly constant as to suggest a close and direct relation between their combined influence and the progress of mortality from pneumonia. But," he adds, "the major influence by the seasons, however, is probably not direct, that is, by a lowering of the bodily temperature resistance due to the low temperature, high barometric pressure, direction and velocity of the wind, etc., but indirect, namely, by bringing about that effective element in the causation, concentration and increased virulence of the specific poison in consequence of closed doors and windows and lack of free ventilation."

From these facts we see that we may procure immunity from pneumonia by healthy living, and that sanitary conditions are needed rather than protective serums. The Japanese give us a lesson in this, for they are essentially a people who live in fresh air and sunshine. Personal cleanliness is another factor in the prevention of tuberculosis and pneumonia, which are house diseases.

FISH ROE IN GREAT DEMAND

Good Prices Offered in France for Important Product of Atlantic Coast Fisheries.

There is now offered to the fishermen of the New England coast a ready and profitable market in France for fish roe, or spawn, an important by-product of the cod, hake and pollack fisheries.

"The sardine fishery, a valuable industry of France," says Consul General Mason, "is confined principally to the 150 mile stretch of the Atlantic coast from Lorient to the mouth of the Gironde, the principal mart of the sardine fisherman being at Les Sables d'Olonne. The sardine spawns in deep water and comes about five months of the year to shallow waters along the coast in search of food. The different minute marine growths which form the natural food of the sardine have become depleted, and in order to attract and retain the immense shoals of that fish on the French coast the fishermen have been obliged for years to feed or bait the sardines with some material as similar as possible to their natural food. For this purpose the main recourse of the fisherman has been to the roe or eggs of codfish and mackerel, derived from the fisheries of Norway, pickled in salt brine, packed in wooden barrels and imported to France under the name of roe or codfish and mackerel, dutiable at 16 cents per long ton.

"There are engaged in the French sardine fishery about 2,000 boats, each of which uses under ordinary conditions about 25 barrels of roe during the fishing season of each year. Of this vast quantity about 30,000 barrels per annum have been derived from the Scandinavian fisheries, some from the French cod fisheries on the coast of Newfoundland and a small quantity from the United States. The price, delivered in France, has ranged from \$12 to \$20 per barrel, but this year for some reason the supply from Norway has been abnormally small, and the price has advanced to nearly \$30 per barrel."

Getting Timid.

Assistant—That railroad official wouldn't have pictures of his office taken. Photographer—Why not? "Because I told him we couldn't do it by flashlight, and would have to make an exposure."—Baltimore American.

The Eternal Problem.

The Young Man (enthusiastically)—I say who is that beautiful woman here? Do you know her? The Older One—I don't, though I've been married to her for the last five years!—Bystander.

Exposing pure oil of turpentine mixed with one per cent. of lavender is the finest of all simple methods for purifying the air of a stuffy room.

ASTONISHING LAND VALUES

United States and Canada Rich in Examples of Rapid Rise in Prices.

To those who are skeptical of the wisdom of investing money in real estate there are numerous instances of cities where every inch of land is of great value which have been built upon sites formerly sold for little or even given away. The United States and Canada are rich in such examples. Canada especially has been the scene of great bargains in land. During the first years of its history James I. made a free gift of the whole of Canada, together with Newfoundland and Nova Scotia, to the famous Lord Stirling. Some 200 years later a member of the suite of the governor of the colony was granted 100,000 acres of land by William IV. Later this was increased by the addition of 500,000 acres. Sixty years later a Canadian land company was given 3,000,000 acres, 2,000,000 being paid for at the rate of 50 cents an acre, and the rest a free gift. As late as 1880 the Canadian government actually made the Scotch-Canadian company a present of \$2,500,000 in cash, a bonus, with a free grant of 25,000,000 acres. As there were many conditions as to the development of the territory in the terms of the grant, the bargain was not so one-sided as it at first appears.

Everyone knows that the whole of Manhattan Island was sold by the Indians for \$24. Yet a plot of ground which was once a farm, and was granted and still belongs to Trinity church, yields a yearly income of \$10,000,000.

Pennsylvania, the second most populous state in America, containing scores of prosperous cities, has an area of about 45,000 square miles. This tract of land was given over to William Penn in settlement of a commercial debt which Charles II. owed to Penn's father, and which he found himself disinclined or unable to pay in cash.

The same improvident king was the one who rented 2,700,000 square miles of the land about Hudson Bay for a yearly rental of two beavers and two elk per annum. This has proved to be one of the best speculations in land on record. Some 200 years after the deal the company of owners sold the major part of this vast territory to the Canadian Federation for \$2,500,000, and in the meantime it had been bringing in an average income of \$500,000 a year.

Not more than 270 years ago the present site of Liverpool was sold for \$2,250 by a small London syndicate, who had bought it from Charles I. for less.

The site of Johannesburg and "most of its gold mines, which are said to contain over \$14,000,000,000 worth of the precious metal, were sold less than 30 years ago to an Englishman named Pratt for the sum of \$1,500. In spite of its cheapness it was a bad bargain for him, for because of his activity in the first Boer war his property was confiscated and he was driven to England in a penniless state.

FORECASTING BIG FLOODS.

Most Destructive Inundation for Fifty Years Accurately Foretold by Weather Bureau.

Early in 1897 telegrams were posted in a hundred cities along the Mississippi, warning the inhabitants to prepare for tremendous floods. These warnings, says J. E. Watkins, in the Technical World, went so far as to name the exact date—sometimes two or three weeks off—when the coming flood would be at its height, and even stated the number of feet above low-water mark the water would reach. They were signed by the chief of the weather bureau at Washington.

The inhabitants of Cairo, New Orleans and of the towns and cities between read these sensational messages, looked out at the shrunken Father of Waters flowing calmly along within its banks and sniffed contemptuously. They were not going to be scared by a lot of fool scientists in Washington! Only a comparatively few timid people were at all alarmed or even impressed. These went so far as to move their valuable property up onto high ground, and were well laughed at for their pains. Even the newspapers took the matter up, and scolded the government for allowing the weather bureau to frighten needlessly a lot of silly old women.

Finally the date set for the coming of the flood arrived, and with it came the water. The greatest flood for more than half a century swept down the Mississippi and overflowed more than 12,000 square miles of land. The main streets of a hundred towns and cities were under water; and, at some points practically the only property not damaged was that of the ridiculed people who had heeded the despised warning of the weather bureau. And it was estimated that property to the value of \$15,000,000 was saved, which would certainly have been destroyed but for the advance notice which its owners had been wise enough to heed.

Jail-Breaker's Offense.

The charge against a man named Armstrong, who had made his escape while being taken to jail, the other day, was: "That Armstrong got at large whithersoever he would, to the great hindrance of justice and the evil example of all others in the like case offending, and against the peace of our sovereign lord the king, his crown and dignity."

Thoroughly Professional.

"Did you say that she is a professional nurse?" "I think so. Anyway, she's going to marry him just as soon as he can sit up."—Milwaukee Sentinel.

Eat one of King's Dyspepsia Tablets after each meal and you will not suffer with indigestion. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

The Rev. Dr. P. S. Henson says the country is going insane because it refuses to take sufficient rest.

The cleansing, antiseptic and healing properties of Pinesalve make it superior to family salves. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

ABOUT THE NEW DRESSES.

The Empire Styles Lead, with Them Are Worn Pretty Little Coats and Broad Sashes.

Much speculation has been rife in Paris as to the lines to be adopted in the coming season for the new dresses. Rumor said a return to the frills of 1870 was imminent, but no one could speak with certainty, since the leading dressmakers declined to give the slightest hint as to the styles in preparation. Now, at last, your correspondent has been by special favor allowed a glance at the models which are to be displayed to customers from all parts of the world. And let it be said at once that the majority of gowns will be constructed on Empire lines. Small boleros, clasping the bust closely, and bound to the figure by folded satin sashes, or pieces of wondrous embroidery, will play a leading role on both day and evening dresses. From under this folded sash, which runs up high at the back, the skirt will fall in graceful folds. Across the front of the bodice a good deal of padding is used to give the straight, square look to the bust which is essential for success.

In cloth gowns, of coat and skirt type, there is a quaint adaptation of this Empire idea. The very short bolero of last autumn has a loose basque added to it, which falls away from the figure beneath the arms and descends to the waist-line. Beneath this coat the skirt rises high over the bust, ending sometimes with straps over the shoulder.

Of biases there are none. Their place is taken by the elegant lace guimpes which finish the Empire gowns. Fine and beautiful laces are used for these, and any bits of good lace can be brought into use. With a little bit-shaped piece of Irish lace forming the middle of the front of the bodice, straight lapels of the same lace can be placed on the sleeve, running down the middle, the material used for the gown forming tightly draped puffs on either side.—N. Y. Tribune.

WHEN THERE IS NO MAID.

How to Have a Successful Dinner Party When Hostess Must Prepare and Serve.

Plan the meal beforehand with direct reference to making a minimum of cooking and serving at the last moment. First select such dishes as can be prepared wholly or in part some time before the meal. Set the table ready for the first course and, if it is warm weather, the windows open and a strong breeze with much dust, throw over all a cover made of several breadths of cheese cloth. Select the china, glass and silver for the various courses and arrange on the sideboard or an extra side table, putting the set for each course by itself. In the kitchen put a table as near to the communicating door as possible; keep half of it clear to receive the soiled dishes. On the other end place the platters, etc., on which to dish up the hot food. When the meal time arrives put the first course on the table before asking your guests into the dining room. When it is finished they will, presumably, be deep in conversation while you are employed in changing the dishes. Having everything in readiness this will take but a few moments and you can resume your seat. When there is no host to do the honors it will relieve you if you are at liberty to ask one or more of the guests to serve certain dishes.—Chicago Chronicle.

Cleaning Carpets.

Carpets should be taken up, and if not cleaned professionally should be beaten, well brushed and hung out of doors to freshen the colors. When relaying carpets a layer of felt should be placed below them. This serves the double purpose of wear and tear and makes the rooms warmer. For the sake of economy sheets of brown paper may be used instead of felt, and make an admirable substitute. If the colors of the carpet are dull they may be brightened by rubbing it over with a flannel cloth wrung from water mixed with a little ammonia.

Not Filling for Cakes.

Make the nuts fine through any process, by a meat chopper or pound in a tray with your rolling pin. Use French walnuts, pecans, hickory nuts, almonds or cocoanuts. Beat the yolk of an egg, add two-thirds of a cup of thick, sour cream, stir in the nuts and beat until stiff. Sweeten with a liberal cup of sugar, powdered is best. Flavor with vanilla and the mixture is ready to spread on layers of cake already prepared, or to fold in a flexible sponge cake if desired.

Matting.

Matting should not be washed with soapy water. A strong solution of salt water cleans matting, and makes it look quite new. In laying matting place one or two thicknesses of old newspapers underneath it, for it always lets down and dirt through like a sieve, and when it has to be taken up the pieces of dust covered paper can be carefully lifted and burned.

A Simple Remedy.

Many cases of indigestion, headache, neuralgia, cold hands and feet can be quickly cured by drinking slowly one or two pints of water so hot that it almost burns the throat.

Good Poultry.

Tea leaves make an excellent poultry for burns.

For Burns.

Apply white of egg at once. It will give relief.

A HARD LOT.

of troubles to contend with, spring from a torpid liver and blocked bowels, unless you awaken them to their proper action with Dr. King's New Life Pills; the pleasantest and most effective cure for Constipation. They prevent Appendicitis and tone up the system. 25c at E. T. Whitehead & Co's drug store.

He—My motto is, "Never give up." She—Yes; I've frequently noticed it in a crowded street car.—Philadelphia Record.

My Hair is Extra Long

Feed your hair; nourish it; give it something to live on. Then it will stop falling, and will grow long and heavy. Ayer's Hair Vigor is the only genuine hair-food you can buy. It gives new life to the hair-bulbs. You save what hair you have, and get more, too. And it keeps the scalp clean and healthy.
